## **DETAILED ACTION**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 9 has been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Mark C. Pickering on 11/21/05.

### ***Allowable Subject Matter***

2. Claims 3 thru 8 are allowed. The following is an examiner's statement of reasons for allowance: The references of record, either singularly or in combination, do not teach or suggest at least a semiconductor circuit comprising: a third transistor formed in the semiconductor material, the third transistor having a third channel and a layer of third gate oxide formed over the third channel, the third channel having a third channel length and a third dopant concentration, the layer of third gate oxide having a thickness, the third transistor being substantially non-conductive when zero volts are applied to the gate, the thickness of the layer of third gate oxide being substantially equal to the thickness of the layer of first gate oxide.

Regarding claims 15-24, the references of record, either singularly or in combination, do not teach or suggest at least a semiconductor circuit comprising: a first transistor having: a first channel region having a first length; a layer of first gate oxide having a first thickness; the first

transistor conducting more than a leakage current when the first gate, the first source, and the first semiconductor region are connected to a same potential; a second transistor having: a second channel region, the second channel region having a second channel length that is greater than the first channel length; a layer of second gate oxide, the layer of second gate oxide having a second thickness that is greater than the first thickness; and the second transistor being substantially non-conductive when the second gate, the second source, and the second semiconductor region are connected to a same potential.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
